## PROFESSIONAL SUMMARY

---

Detail-oriented and motivated Software Testing professional with knowledge of test case design, defect reporting, manual testing, and Selenium-based automation testing. Knowledge in Java and SQL, with a keen interest in ensuring software quality and delivering reliable applications.

## EDUCATION

---

**PES Institute of Technology and Management, BE in ISE** 2022 - 2026 | Shivamogga  
CGPA: 7.7/10

**Vagdevi PU College, Class 12th** 2020 - 2022 | Thirthahalli  
Percentage: 87%

**Vagdevi School, Class 10th** 2019 - 2020 | Thirthahalli  
Percentage: 81%

## TECHNICAL SKILLS

---

**Manual Testing:** Requirement Analysis, Test Scenario Preparation, Test Case Design, Test Execution, Defect Life Cycle, Defect Reporting & Tracking, Functional Testing, Smoke Testing, Sanity Testing, Regression Testing, Integration Testing, System Testing.

**Automation Testing:** Selenium WebDriver (Java), Locators (XPath, CSS Selector), WebElement Handling, Basics of Test Automation Framework, Pop-ups, Synchronization, TestNG, Iframes, Action class, POM.

**Java:** OOPs Concepts, Exception Handling.

**SQL:** GROUP BY, HAVING, ORDER BY, JOINS, subqueries, constraints, normalization, and database validation, DDL, DML, DQL, TCL, Aggregate Functions.

**Tools:** Eclipse, VS Code, Selenium WebDriver, JIRA.

## PROJECTS

---

### Secure Document Sharing Using Visual Cryptography (Major Project) [2026]

- Developed a secure document-sharing application using Python and Visual Cryptography, implementing encryption and decryption methods for sharing sensitive documents.
- Integrated secure storage for uploading, retrieving, and managing encrypted document shares.
- Added input validation and integrity checks to ensure accurate document reconstruction, improving overall system reliability and security.
- Designed the application workflow to support reliable, scalable, and efficiently managed software solutions for secure document management.

### Shoppers Stack - E-Commerce Testing Project [2026]

- Performed manual testing on Shoppers Stack, an online shopping portal, executing test scenarios and test cases covering product browsing, cart, and checkout functionality across web and mobile environments.
- Identified, logged, and tracked defects, applied functional, smoke, sanity, and regression testing concepts to ensure a smooth and reliable shopping experience.

### Demo Web Shop - E-Commerce Automation Project [2026]

*Automation Testing | Selenium WebDriver | Java*

- Automated Login and Registration functionality using Selenium WebDriver with Java.
- Automated Product Search and Shopping Cart workflows using XPath, CSS Selectors, and WebElements.
- Performed functional testing by validating expected results and user interactions across the application.

## ACHIEVEMENTS

---

- Participated in the NCAIET-2025 conference with a paper on Secure Document Sharing using Visual Cryptography.
